

Digital HD Satellite Receiver

This digital HD satellite receiver is an easy-to-use receiver for receiving all free-to-air TV and radio channels via satellite and radio stations via satellite, including programs broadcast free-to-air in HDTV in Full HD 1080p. By connecting an external hard disk or USB stick, the device becomes a multimedia station for playing movies, pictures and music. A USB storage medium (external hard disk) is not included in the scope of delivery. Thanks to the external 12V power supply, this receiver is also ideal for your camping vacation. The scope of delivery includes a teachable remote control with which you can and control your TV set - batteries included.
