

DESCRIPTION AND DATA

The HD-capable hybrid receiver is equipped with a hybrid tuner for receiving digital terrestrial programs (DVB-T2} or cable TV programs (DVB-C). Countless connections are available: A USB 2.0 port, a LAN interface, a digital sound output (COAXIAL), a Scart connection - as well as an HDMI connection. Optionally, a WiFi antenna can be connected via the USB port. By connecting an external hard disk, the device becomes a multimedia station and allows the viewer to play pictures, films or music files. With the teachable remote control, you can learn the switching signals of your TV remote control and use them to control your TV.

- DVB-T2/DVB-C hybrid tuner (HDTV)- H.265 HD
